

Transportation Energy Consultant

Booz Allen Hamilton, a leading strategy and technology consulting firm based in the Washington, DC area, is seeking consultants for our growing Energy, Transportation, and Environment practice. With more than 22,000 people, Booz Allen is a private company with approximately \$5 billion in annual revenue. We are continually recognized for our quality work and corporate culture, and have been featured in the Best Companies rankings by *Fortune*, *Working Mother*, *BusinessWeek*, and *Washingtonian* magazines—and many others.

Key Roles:

Assist government clients in developing transportation and energy policy and in the evaluation of advanced vehicle technology, including electric vehicles and vehicles powered by alternative fuels. Devise strategies and plans for the implementation of advanced vehicles and alternative fuels, including planning for fueling infrastructure. Model emissions, cost implications, and impact on electricity grid/fueling infrastructure resulting from advanced vehicle adoption. Track federal and state policy affecting the energy and environmental impact of transportation.

Basic Qualifications:

- Previous work experience in the utility, automotive, and/or energy sectors
- Strong technical background, including undergraduate/graduate engineering or science degree
- Passion for developing novel transportation energy solutions
- Familiarity with advanced powertrains and components (including batteries, electric motors, and fuel cell systems) and alternative fuels (such as CNG)
- Familiarity with the national electricity grid and/or natural gas infrastructure
