

Financial Analyst/Financial Modeler (Renewable Energy)

A small, but experienced financial engineering firm focused on financing commercial scale solar projects is seeking to hire a Financial Analyst to assist firm in its financial modeling. We are located in Westchester County, NY and are accessible by public transportation. Candidates with 2-3 years investment banking/consulting/tax equity experience are strongly encouraged to apply. New York City applicants encouraged to apply.

The Analyst should have experience in a financial modeling intensive role. Firm grasp of capital markets and quantitative research techniques are essential. Tax equity and project finance experience a strong plus.

Appropriate candidates will have a strong interest in learning the solar and renewable energy industries and desire to work for a dynamic company in a fast growing industry. Prior experience in energy industry is a plus but certainly not a prerequisite.

Successful candidates must possess superb financial modeling skills and have a close eye for detail. In addition, He/she must also have strong communication and analytic skills and be able to work independently and meet demanding deadlines. Most importantly, candidates must have a good attitude, sense of humor and entrepreneurial spirit. MBA graduates encouraged to apply.

Competitive salary

Position Summary:

Responsibilities

- Create and modify financial models
- Perform relevant sensitivities requested by senior management
- Act as liaison between firm and appropriate investors
- Perform additional duties (marketing, partner outreach, public policy research, etc.) as required
- Work closely with senior staff and assist in overall day to day business operations

Qualifications

- 2-3 years professional finance experience
- Excellent financial modeling skills
- Tax equity and project finance experience (not necessarily required—but strongly preferred)
- Attention to detail
- Willing to work long hours as necessary
- Ability to work independently
- Great attitude, personable and good sense of humor
- Passion for excellence
- Interest in the solar industry
- Entrepreneurial spirit
- Openness to constructive feedback
- Strong organizational and time management capabilities
- Proficiency in Microsoft Word and PowerPoint. General knowledge of Excel. Access experience is a plus
- Four year degree

Applications must include a resume and cover letter. After pre-screening, candidates are expected to provide sample modeling work and references.
