

**Title:** Electrical Engineer  
**Location:** Boston, MA  
**Employment Type:** Full Time  
**Qualification:** Postgraduate or above  
**Experience:** Manager Level

Cambrian Innovation is looking for an Electrical Engineer to join our growing team. The ideal candidate will have a highly successful academic record, experience in the laboratory, a high attention to detail and capability to undertake independent research tasks. An interest in next-generation renewable energy technology, environmental entrepreneurship and experience with bio-electrochemical systems is also positive.

**Education and Experience Level:** Bachelors with laboratory experience. Masters Degree or PhD preferred.

Fields of Study:

- Electrical Engineering
- Electrochemistry
- Bio-electrochemical Systems

Additional skills that may be of interest include:

- Auto CAD, LabView, and Matlab
- Programming / Software development
- Signal Processing
- Circuit Design
- Control Systems Theory
- Laboratory Techniques
- Biological Laboratory Techniques

Eligible candidates please submit a resume and cover letter to Karla Franco, Operations Manager at [Kfranco@ambrianinnovation.com](mailto:Kfranco@ambrianinnovation.com).

**Company Description:** Cambrian Innovation™ is an environmental product development company focused on moving revolutionary scientific discoveries from bench to market. As a world leader in the commercialization of bio-electrochemical systems, our technological platform has application to a range of industries including wastewater treatment, renewable natural gas, distributed sensing, and aerospace.

Cambrian is building an innovative product platform with a network of collaborators in industry, academia, and government. We also provide market and technical feasibility analysis for corporate and government clients interested in quickly determining the validity of novel technologies.
