Company

C12 Energy is a startup that is making geologic CO₂ capture and sequestration (CCS) a reality in saline aquifer and EOR settings. The company has investment from premier venture capital and private equity firms including Sequoia Capital, General Catalyst Partners, and the Reservoir Capital Group. The C12 team energetically tackles all issues related to carbon sequestration development.

Position Description

C12 Energy is seeking multiple interns with superior analytical skills and an outstanding work ethic to join us in our Berkeley, CA office for the summer of 2011. The ideal candidate is in graduate, business, or law school and has keen interest and/or experience in carbon capture and storage.

We are interested in interns to focus on the following areas:

- Policy related research, including assessment of the role of property rights in carbon sequestration development as well as review and analysis of select proposed and enacted CCS legislation and regulations at the state and national levels.
- Risk management strategies, including approaches to provide adequate financial assurance
- Technical evaluation of geochemical and geomechanical aspects of carbon sequestration.

Summer salaries will be based on experience.

C12 Energy is an equal opportunity employer.
